

## DevOps Engineering on AWS

In this course, you will learn the most common DevOps patterns to develop, deploy, and maintain applications on the AWS platform. We will explore the core principles of the DevOps methodology and examine a number of use cases applicable to startup, small- to medium-sized business, and enterprise development scenarios.

In this course, you will learn how to:

- Use the principal concepts and practices behind the DevOps methodology
- Design and implement an infrastructure on AWS that supports one or more DevOps development projects
- Use AWS CloudFormation and AWS OpsWorks to deploy the infrastructure necessary to create development, test, and production environments for a software development project
- Use AWS CodeCommit and AWS CodeBuild to understand the array of options for enabling a continuous integration (CI) environment on AWS
- Use AWS CodePipeline to design and implement a continuous integration and continuous delivery (CI/CD) pipeline on AWS
- Use AWS CodeStar to manage all software development activities in one place
- Implement several common continuous deployment (CD) use cases using AWS technologies, including blue/green deployment and A/B testing
- Distinguish between the array of application deployment technologies available on AWS, including AWS CodeDeploy, AWS OpsWorks, AWS Elastic Beanstalk, Amazon Elastic Container Service (Amazon ECS), and Amazon Elastic Container Registry (Amazon ECR), and decide which technology best fits a given scenario
- Use Amazon EC2 Systems Manager for patch management
- Leverage automated testing in different stages of a CI/CD pipeline
- Fine-tune the applications you deliver on AWS for high performance, and use AWS tools and technologies to monitor your application and environment for potential issues

Who Should Attend?

This course is intended for system administrators and software developers.

## Prerequisites

We recommend that attendees of this course have the following prerequisites:

- Systems Operations on AWS or Developing on AWS
- Working knowledge of one or more high-level programming languages, such as C#, Java, PHP, Ruby, or Python
- Intermediate knowledge of administering Linux or Windows systems at the command-line level
- Working experience with AWS using both the AWS Management Console and the AWS Command Line Interface (AWS CLI)

## Delivery Method

This course is delivered through a mix of:

- Classroom training
- Hands-on labs

## Hands-on Activity

This course allows you to test new skills and apply knowledge to your working environment through a variety of practical exercises.

*Contact our Client Support team to learn about guaranteed to run dates for this class.*

### Course Outline:

DevOps and DevSecOps

The AWS Command Line Interface (AWS CLI)

Deployment strategies and developer tools

Infrastructure as Code (IaC)

AWS developer tools

Automated testing on AWS

Configuration management

Building AMIs and Amazon EC2 Systems Manager

Containers: Docker and Amazon ECS

### Class Schedule:

Day 1: 9:30am-5:30pm ET/6:30am-2:30pm PT

Day 2: 9:30am-5:30pm ET/6:30am-2:30pm PT

Day 3: 9:30am-5:30pm ET/6:30am-2:30pm PT

**Price:**

\$2025

**Course Fee Includes:**

- Easy course access: Attend training right from your computer. Easy and quick access fits today's working style and eliminates expensive travel and long days in the classroom.
- Live, expert instruction: Instructors are sought-after practitioners, highly-experienced in the industry who deliver a professional learning experience in real-time.
- Rich virtual learning environment: A variety of tools are built in to the learning platform to engage learners through dynamic delivery and to facilitate a multi-directional flow of information.
- Hands-on exercises: An essential component to any learning experience is applying what you have learned. Using the latest technology, your instructor can provide hands-on exercises, group activities, and breakout sessions.
- Real-time communication: Communicate real-time directly with the instructor. Ask questions, provide comments, and participate in the class discussions.
