

- Gain understanding of the Agile Release Train and how you can be an effective team member
- Discover how to write stories and break down features, plan and execute iterations and plan Program increments
- Learn about the continuous delivery pipeline and DevOps culture
- Prepare yourself to take the SAFe 4 Practitioner Exam

Build the skills needed to become a high-performing team member of an Agile Release Train (ART)—and learn how to collaborate effectively with other teams—by becoming a SAFe® 4 Practitioner (SP). During this two-day course, attendees will gain an in-depth understanding of the ART, how it delivers value, and what they can do to effectively perform their role using Scrum, Kanban, and XP. Participants will also learn how to write stories and break down features, plan and execute iterations, and plan Program Increments, as well as learn about the continuous delivery pipeline and DevOps culture, how to effectively integrate with other teams in the program, and what it takes to continuously improve the train.

Attending the class prepares individuals to take the exam and become a certified SAFe® 4 Practitioner (SP).

## Learning Goals

To perform the role of a SAFe® Practitioner, attendees should be able to:

- Apply SAFe to scale Lean and Agile development in their enterprise
- Know their team and its role on the Agile Release Train
- Know all other teams on the train, their roles, and the dependencies between the teams
- Plan Iterations
- Execute Iterations and demonstrate value
- Plan Program Increments
- Integrate and work with other teams on the train

## Who Should Attend

The following individuals will benefit from this course:

- Team members who apply Lean and Agile at scale
- All members of an Agile Release Train preparing for launch

## Prerequisites

All are welcome to attend the course, regardless of experience. However, the following prerequisites are highly recommended for those who intend to take the SAFe® Practitioner (SP) certification exam:

- Familiarity with Agile concepts and principles
- Awareness of Scrum, Kanban, and XP
- Working knowledge of software and hardware development processes

## SAFe Certification Kit

Attendees who pass the certification exam will receive:

- SAFe Practitioner certificate
- A SAFe 4 Practitioner digital badge to promote your accomplishment online
- A one-year certified membership as a SAFe Practitioner, which includes access to the SP Community of Practice

- A SAFe Practitioner certification usage guide with SP certification marks
- Access to a variety of learning resources to support certified professionals during their SAFe journey

## Exam Details

Exam name – SAFe 4 Practitioner Exam

Exam format – Multiple choice, Multiple Select

Exam delivery – Web-based (single-browser), closed book, no outside assistance, timed

Exam access – Candidates can access the exam within the SAFe Community Platform upon completion of the SAFe 4 Practitioner course
